

To Whom It May Concern:

27/5/2014

This Letter of Commendation regarding Sebastian Kevany is in recognition of his services to the United Nations Development Program, the Global Fund to Fight AIDS, Tuberculosis and Malaria, and the Iraq Ministry of Health based on his work in Iraq in 2012 and 2013.

Sebastian worked extensively in potentially insecure environments during his travels throughout the Kurdistan Regional Governorate region, as well as advancing both diplomatic and global health agendas, through his work with on-site data verification activities.

In addition, his production of related academic literature has helped to further advance policies of 'diplomatic development' in the Iraq context, suggesting that diplomatic & foreign policy gains may occur through appropriately-designed global health programs.

Please feel free to contact for any further details.

Yours sincerely,

***Prof. Thamer Al Hilfi
